The Clants won from the Brooklyns yesterday and the Phillies took two games from the Bostons. Although the Phillies ed half a game, the Giants need only three more wins to cluch the pennant, and this allowing that the Phillies will win the playoff of the disputed game of August 30. The Cubs trimmed the faltering Pirates without much trouble.

Passing on to the Dodgers, it cannot be left unsaid that Patrick Don Carlos Ragan was kept in the box long after it was evi-dent to novices that he had nothing with which to deceive the men from the Polo Grounds. This fact was apparent when the Glants rolled up four runs in the second inning, a crazy throw by Moran ren-dering some assistance.

Doyle's Bat Barely Misses Spectators

CAPT. LARRY DOYLE can thank his stars that he didn't seriously injure several spectators who sat behind the Giants' bench at Ebbets Field yesterday. Doyle was so eager to knock the cover off the ball in the first inning that he lost his temper when he raised a fly to Stengel. Incidentally he threw his bat with all his might in the direction of his fellow players. The heavy stick, however, did not fall on the ground. It sailed squarely into a private box, where three men jumped aside in the nick of time. Umpire Klem gave Doyle a tongue lashing.

Davis Here to See INTO BOTTOM BERTH How Giants Behave

CONNIE MACK, anxious to obtain a line on the strength of the Giants, who will meet his champion Athletics in the world's series, sent the veteran Harry Davis to Ebbets Field yesterday. Davis didn't wear gumshoes, neither was he disgusied. He sat among the fans within a few yards of the Giants' bench and seemed to enjoy his surroundings. But the Quaker scout didn't have a chance to size up weak points in batting because Ragan's pitching lacked the necessary puzzling quality. Davis intends to see the Giants play to-day and to-morrow. Then he may be able to make a report worth hearing.

the active motorcycle policeman there will be interested to know that Supervisor Hiram R. Smith of the town of Hempstead some time ago requested the District Attorney of Nassau county to send this policeman, Otto Payne, to the north side of the island "for the good of the service." It is hardly likely the change will be made now, because it is getting late in the season and the District Attorney has not yet acted.

Under the existing law the State gets the fines that are levied under the automobile law. The town pays the fees of the justice of the peace who sits and the motorcycle man gets a fixed salary. Payne customarily brings his cases before Justice E. T. Neu of Lynbrook, who gets from \$3.20 to \$4.20 a case, so that as Payne is very active gathering in the motorists on Saturdays and Sundays the monthly bills against the town are large. Arrests are made mostly for failure to have tail lights showing in accordance with the law or else for speeding. Supervisor Smith has the idea that Payne has been enforcing the laws too rigidly and that in many cases the arrests worked unnecessary hardships on users of the roads. There are many New York city automobilists who have been arrested by Payne and have paid good sized fines in Justice Neu's court who will be able to support Payne's withdrawal with comparative cheerfulness.

Mayor Haussling issued a proclamation this afternoon calling for a holiday on Saturday. He asks the citizens to decorate their homes and business places "to attest their appreciation of the sturdy athletes who by their skill and courage have brought home to the city which the

Stop Skidding for the Scrap Heap

Friction is slowly, surely sending your car to the scrap heap. In spite of the best lubricating oils and greases, it continually wears away the finest bearings. Every bearing is full of little holes and pin points that can readily be seen with

a microscope. It is these that cause friction. Dixon's selected flake graphite is the only lubricant known that will fill up these holes and build up around these pin points a smooth, oily veneer that grows finer and more smooth by continual use and wear. It is unaffected by heat or cold. It will not turn thin. The Joseph Dixon Crucible Company are the only people in the world who produce this peculiar form of graphite. With this rare form of flake as a basis we have produced a line of graphite lubricants specially designed for

every separate part of the car. Try Dixon's Transmission and Differential Grease No. 677 on your car and see what a difference it will make in mileage and smoothness of running. Dealers who sell real service know and recommend Dixon's Graphite Greases.
